

BLACK & GOLD by Roberto Semprini for BANCİ**in Gallery Cattai Via Fiori Chiari 7 Milan Fuori Salone 2015**

On a symbolic level, metals such as iron and brass embody eternity, durability and timelessness. Compared to wood, these metals evoke strength, but also hardness. Created by the gods, metals are actually among the most noble of the earth's materials and the smiths, once revered and feared, are artisans of peace. Gold is at the top of these symbolic features.

The symbolism of Gold

Coincides with the symbol of the sacred, the very substance of the Gods and because of its rarity and preciousness: a symbol of wealth and power.

The symbolism of Black

Signifies absolute elegance, power and austerity; paired with gold it enhances the splendour and embodies design elite.
