## PREVIEW SALONE DEL MOBILE 2015

Colour, materials, research and refinement have formed the base of our design process for 2015. We are happy to present the Cross(me)knot collection designed by studio CTRLZAK, the Spazio Pontaccio collection designed by Federico Pepe, a preview of our new Behindsurfaces collection designed by Federico Delrosso, Casellario monocromo by Parisotto and Formenton and the cc-tapis team has been hard at work developing the Dipped collection and Stencil rugs. A pleasure to look at and an experience to touch, our rugs combine the age-old traditions of Tibetan artistry with contemporary design.

## who we are

cc-tapis® was created in 2011 by the traditional Persian house Maison Chamszadeh, founded in 1943 and well known in France for the quality of its handknotted rugs. The main headquarters are now in Milan, where a team of designers innovate through a new approach to traditional methods. Undyed raw materials, innovative weaving patterns and techniques are a key part of the process. All cc-tapis® rugs are completely handknotted by expert Tibetan artisans in Nepal. A strong respect for materials and for the culture of this ancient craft is reflected in the company's eco-friendly approach to every step of production, ranging from the hand spinning of the softest Himalayan wool to the use of purified rainwater for the washing of the final products, making each one of cc-tapis® rugs unique. No chemicals, acids or artificial fibres are ever used in the process. Far from mass production, cc-tapis® aims to offer a tailored service to those who understand and enjoy a high-end product, where a three month production time contains a story of ageless culture.

## customization

To produce our carpets exclusively by hand means that we are able to realize any carpet custom made. We can adapt the dimensions, give many of our models new colors, or work with you on a completely new creation. There are endless possibilities to create your unique carpet with more than 1200 different colors with materials like wool, silk or aloe, combined to create different textures and different heights of pile.

## **.Behindsurfaces designed by Federico Delrosso**

A new rug from Architect Federico Delrosso is a work in progress and the first in a new collection called Behindsurfaces. Federico Delrosso investigates the unseen, the surfaces behind surfaces in our every day lives. Something that only becomes visible through the removal or decay of another surface. Hidden textures, patterns and beauty.

Made from 100% Himalayan wool and silk.

Proudly hand-knotted in Nepal.  
quality A+ 152,000 knots/sqm approx.
