## PREVIEW SALONE DEL MOBILE 2015

Colour, materials, research and refinement have formed the base of our design process for 2015. We are happy to present the Cross(me)knot collection designed by studio CTRLZAK, the Spazio Pontaccio collection designed by Federico Pepe, a preview of our new Behindsurfaces collection designed by Federico Delrosso, Casellario monocromo by Parisotto and Formenton and the cc-tapis team has been hard at work developing the Dipped collection and Stencil rugs. A pleasure to look at and an experience to touch, our rugs combine the age-old traditions of Tibetan artistry with contemporary design.

## who we are

cc-tapis® was created in 2011 by the traditional Persian house Maison Chamszadeh, founded in 1943 and well known in France for the quality of its handknotted rugs. The main headquarters are now in Milan, where a team of designers innovate through a new approach to traditional methods. Undyed raw materials, innovative weaving patterns and techniques are a key part of the process. All cc-tapis® rugs are completely handknotted by expert Tibetan artisans in Nepal. A strong respect for materials and for the culture of this ancient craft is reflected in the company's eco-friendly approach to every step of production, ranging from the hand spinning of the softest Himalayan wool to the use of purified rainwater for the washing of the final products, making each one of cc-tapis® rugs unique. No chemicals, acids or artificial fibres are ever used in the process. Far from mass production, cc-tapis® aims to offer a tailored service to those who understand and enjoy a high-end product, where a three month production time contains a story of ageless culture.

## customization

To produce our carpets exclusively by hand means that we are able to realize any carpet custom made. We can adapt the dimensions, give many of our models new colors, or work with you on a completely new creation. There are endless possibilities to create your unique carpet with more than 1200 different colors with materials like wool, silk or aloe, combined to create different textures and different heights of pile.

## **.CASELLARIO MONOCROMO**

**designed by Aldo Parisotto + Massimo Formenton**

Architectural in design and in nature, simple and delicate tonal variations are created by a combination of materials and different knotting techniques. Far from patchwork, nothing on this rug is haphazard, the architect designers stay true to their trade and have created a rug where every knot has its place and where spaces between material panels show the nude dyed cotton warp. Panels of pure silk are counter-balanced by panels of thick himalayan wool made from 2 different finishing techniques

A blend of deep teal himalayan wool and silk.

Designed by Aldo Parisotto + Massimo Formenton

Proudly hand-knotted in Nepal.  
quality A+ 152,000 knots/sqm approx.
